

What Can You Do With React?

- Front-end / Full-stack developer (using React)
 - Work for virtually any business that has a need for React apps (that uses React)
 - Work can be in-person, remote, or split between the two
 - Best sites to find React jobs: [Indeed](#), [Stack Overflow Jobs](#), [Github Jobs](#)
 - Best sites to find remote React jobs: [RemoteOK](#), [Remotive](#)
- Freelance app developer
 - Make React projects for individual clients (people/companies)
 - Great to start out locally; search and reach out to businesses in your community
 - You can make websites or apps on your own or through as part of a team
- Independent app developer
 - Sell your app on commercial platforms or through individual marketing
 - For individual marketing, focus on writing blog posts on your own site and other popular blogs to get your name out there
 - Sell on: [Shopify](#), [ProductHunt](#), [BetaList](#), Google Play Store, Apple App Store
- Open source developer
 - Create packages for React and JavaScript developers in their projects
 - Get paid by companies and other developers through [Github Sponsors](#), [Patreon](#)
